13. ABSTRACT (Maximum 200 words) IPDO-2007 Symposium's main objectives were to bring the three communities of researchers (inverse problems experts, design theory experts, and optimization experts) together and provide a common forum for presenting different applications, problems, and solution strategy concepts. These three areas of research covered by the IPDO Symposium have a number of things in common. For example, many methodologies for solving inverse problems employ optimization algorithms. However, there are no optimization algorithms that employ methods of inverse design that could substantially reduce the number of time-consuming analysis required by the typical evolutionary optimization algorithms. Similarly, design theory is not well known in the optimization community where formulation of the appropriate multiple objectives and system-of-systems design formulations are often performed using intuition and personal experience. The IPDO-2007 Symposium thus offered a unique international forum that was expected to provide an excellent basis for cross-fertilization of ideas and creation of new synergistic approaches and methodologies that will combine the three fields of research so that more general, robust, accurate and computationally economical design methods are created for multi-disciplinary applications. Contributions dealing with practical applications were encouraged, such as in petrochemistry, aeronautics, bio-medicine, sensing of pollutants, materials processing, non-destructive evaluation, material property determination, etc.

**1. Foreword**

Inverse problems, design theories and multi-objective constrained optimization strategies are three areas of advanced research that are rapidly becoming of common use by practicing engineers and designers. Consequently, there is an upsurge in the number of separate scientific meetings in each of these three general areas. The main objective of the IPDO-2007 - INVERSE PROBLEMS, DESIGN AND OPTIMIZATION SYMPOSIUM held April 16-18, 2007 in Miami Beach, Florida was to bring together the three communities of researchers (inverse problems, design theory and evolutionary optimization experts) and provide a common forum for presenting different applications, problems and solution concepts. IPDO Symposium is a sequence of international technical meetings that was preceded by the following meetings:

ICIDES-I organized by G.S. Dulikravich (University of Texas at Austin, 1984)  
ICIDES-II organized by G.S. Dulikravich (Pennsylvania State University, 1987)  
ICIDES-III organized by G.S. Dulikravich (Washington, DC, 1991)

The IPDO-2007 Symposium is the second in the IPDO sequence. The first IPDO Symposium was IPDO-2004 organized by G.S. Dulikravich, H.R.B. Orlando and M.J. Colaco and held in Rio de Janeiro in March of 2004.

### 4. Statement of the Problem Studied

IPDO Symposium's main objectives were to bring the three communities of researchers (inverse problems experts, design theory experts, and optimization experts) together and provide a common forum for presenting different applications, problems, and solution strategy concepts. These three areas of research covered by the IPDO Symposium have a number of things in common. For example, many methodologies for solving inverse problems employ optimization algorithms. However, there are no optimization algorithms that employ methods of inverse design that could substantially reduce the number of time-consuming analysis required by the typical evolutionary optimization algorithms. Similarly, design theory is not well known in the optimization community where formulation of the appropriate multiple objectives and system-of-systems design formulations are often performed using intuition and personal experience. The IPDO-2007 Symposium thus offered a unique international forum that is expected to provide an excellent basis for cross-fertilization of ideas and creation of new synergistic approaches and methodologies that will combine the three fields of research so that more general, robust, accurate and computationally economical design methods are created for multi-disciplinary applications. Contributions dealing with practical applications were encouraged, such as in petrochemistry, aeronautics, astronautics, bio-medicine, transport and sensing of pollutants, materials processing, remote sensing, non-destructive evaluation, material property determination, acceleration of optimization procedures, etc.

### 5. Summary of the Most Important Results

Location of IPDO-2007: The location for the IPDO-2007 Symposium was Newport Beachside Resort Hotel, 16701 Collins Avenue, Miami Beach, Florida, U.S.A. With a privileged location right on the beach, this hotel has one of the central and most stunning views of the famous North Miami Beach and it is ideal for those who are traveling on business or leisure. When reserving a hotel room, attendees were alerted to mention that it is for the IPDO-2007 so that they can obtain a negotiated reduced rate. Details were made available on the website <http://mcolaco.freeshell.org/ipdo2007/index.htm>

Convention Center: The hotel has three meeting rooms for up to 160 people, including a business center with a computer, FAX, and Xerox copying. For those desiring Internet access, we have negotiated with the hotel to provide wireless Internet access free of charge.

Transportation: For the conference participants, the flight destination shall be either Miami International Airport (MIA) or Fort Lauderdale Airport (FLL). Both airports are served by major airline carriers, with everyday flights from many cities in North America, Central and South America and Europe. Transportation from either of the two airports to the conference hotel on North Miami Beach is available either by bus (approximately \$15 one way) or by taxi (approximately \$40 one way) and it takes 30-45 minutes depending on traffic.

Registration Fees: All participants (including members of the organizing committee and invited speakers) were required to register and pay a registration fee according to the following table.

**Table 1. Registration fees and rates**

	Until February 1, 2007	After January 31, 2007
Participant	US \$325.00	US \$400.00
Graduate Student (with a proof of their status)	US \$180.00	US \$225.00
Guest (not attending technical sessions)	US \$180.00	US \$225.00

Registration fees were collected by the representatives of the FIU Student Chapter of the American Society of Mechanical Engineers. These funds were used to pay hotel fees (rental of conference rooms, food and drinks for the entire meeting including a reception on Sunday, April 15, 2007 and taxes). The registration fees were also used to pay for bags, T-shirts, caps, ball pens, printing of the Books of Abstracts, production of CDs with the abstracts, printing of volumes of IPDO-2007 paper proceedings, production of CDs with final papers, payment of travel expenses for several of the invited speakers, payment of PayPal service, and payment of FIU Student ASME chapter staff services.

### 5.1 AFOSR RESEARCH OFFICE GRANT USE

This grant was for financial co-sponsorship of IPDO-2007 Symposium. Specifically, it was for payment of rentals of conference rooms (\$1,500 plus FIU indirect costs) and for payment of stipends for several invited speakers as follows:

**Table 2. Invited speakers' stipends partially financed by this grant**

### 5.2 ORGANIZING COMMITTEE FOR IPDO-2007

The realization of the IPDO Symposium evolved from the scientific collaboration involving Prof. George S. Dulikravich, from Florida International University, Prof. Helcio R. B. Orlando, from the Federal University of Rio de Janeiro (Brazil), Prof. Masataka Tanaka from Shinshu University, Nagano (Japan), and Prof. Marcelo J. Colaço, from the Military Institute of Engineering (Brazil). They created the organizing committee for the symposium as follows:

CHAIR: Prof. George S. Dulikravich  
 CO-CHAIR: Prof. Helcio R. B. Orlando  
 CO-CHAIR: Prof. Masataka Tanaka  
 SECRETARY: Prof. Marcelo J. Colaço

### 5.3 INTERNATIONAL SCIENTIFIC COMMITTEE FOR IPDO-2007

The International Scientific Committee was composed of recognized experts in Inverse Problems, Design and Optimization, from the five continents and several countries. The committee supported the symposium mainly through the evaluation of all submitted contributions. In addition, many members of this committee attended the symposium to present papers and be invited lecturers. The international scientific committee of the IPDO-2007 Symposium is presented below.

Areas of interest:

The IPDO-2007 Symposium will emphasize a broad range of deterministic, statistical, analytical, computational and experimental approaches, which can be applied to the solution of inverse, design and multi-disciplinary optimization problems. Contributions dealing with theoretical concepts and practical applications are encouraged, such as in petrochemistry, aeronautics, astronautics, bio-medicine, transport and sensing of pollutants, materials design and processing, remote sensing, non-destructive evaluation, material property determination, acceleration of large scale optimization, design theory, etc.

Deadlines:

- 1 October, 2006 proposals for organizing technical sessions (six papers per session)
- 1 November, 2006 deadline for submission of two-page abstracts in .pdf format
- 1 December, 2006 informing authors about acceptability of abstracts
- 1 February, 2007 deadline for submission of full eight-page papers
- 1 March, 2007 deadline for early registration

Abstracts and papers:

Please submit two-page abstracts (including preliminary results, basic figures, formulas, and references) in .pdf format to the following e-mail addresses: IPDO2007@GMAIL.COM, IPDO2007@YAHOO.COM

All accepted two-page abstracts will be published in a Book of Abstracts provided to all participants during IPDO-2007.

## 5.6 IPDO-2007 SYMPOSIUM AGENDA

The ipdo-2007 Symposium lasted three days with two keynote lectures each day. The Symposium involved two parallel sessions every morning and afternoon. Each session started with one 50 minute invited presentation followed by 6-8 contributed papers each taking 20 minutes. This means that there were a total of 6 keynote lectures and 93 contributed papers totaling 99 papers presented at IPDO-2007.

Finally, there was a round-table discussion involving the entire audience of the IPDO-2007 Symposium that attempted to summarize the entire meeting and bring forward a consensus list of recommendations concerning the most promising future directions in research that involves the three areas covered by the IPDO-2007. In addition, the IPDO-2007 participants were informed by the organizers that they are all invited to join in the efforts to form an international society of professionals working in these three areas of research.

## 5.7 KEYNOTE LECTURES

Keynote Lecture 1 (08:40-09:30, April 16, 2007 – Room 1):

*RECENT ADVANCES IN INFERENTIAL SOLUTIONS TO INVERSE PROBLEMS*

Keynote Lecture 2 (14:00-14:40, April 16, 2007 – Room 1):

*MULTI-OBJECTIVE MDO SOLUTION STRATEGY FOR MULTIDISCIPLINARY DESIGN USING modeFRONTIER*

Keynote Lecture 3 (08:40-09:30, April 17, 2007 – Room 1):

*FLUID FLOW IN HYDROCYCLONES OPTIMIZED THROUGH MULTI-OBJECTIVE GENETIC ALGORITHMS*

Keynote Lecture 4 (14:00-14:40, April 17, 2007 - Room 1):

*USING OF THE IOSO NM SOFTWARE FOR COMPLEX OPTIMIZATION PROBLEMS*

Keynote Lecture 5 (08:40-09:30, April 18, 2007 – Room 1):

## 5.8 PLANS FOR COOPERATIVE ACTIVITIES EMERGING FROM THE IPDO-2007

The main objective of the IPDO-2007 Symposium was to bring together researchers from different world regions, dealing with different inverse problems, design concepts and evolutionary multi-disciplinary optimization strategies, for the presentation of their most recent research results and for the technical discussion of their findings. Traditionally, it has been the heat and mass transfer community that has developed some of the most practical methodologies for solving the pertinent inverse problems in diverse applications. IPDO-2007 was clearly successful in bringing together an extremely diverse audience that included inverse problems experts, multi-objective constrained optimization experts and a community dealing with the automatic robust design theories. The fields of applications were equally diverse ranging from biomedicine, material science, materials processing, algorithm developments, solid mechanics, fluid mechanics, electromagnetism, aerospace, structural dynamics, heat transfer, non-destructive evaluations, etc.

At the IPDO-2007 Symposium, an announcement was made by the organizing committee that a new international society for inverse problems is currently been formed and that all IPDO participants are invited to become members once the official announcement is disseminated via Internet. This new society will bring together applied mathematicians, engineers, physicists, chemists, etc. that are interested in developing and utilizing methods and algorithms applicable to the solution of multi-disciplinary inverse problems, design and optimization.

## 6. Listing of all publications and technical reports supported under this grant or contract

### 6.1 PUBLICATIONS AND DISSEMINATION OF RESULTS

Printed Proceedings: Extended abstracts (two pages maximum) of all papers submitted for presentation at the IPDO-2007 Symposium (including the 6 keynote lectures) were refereed by a minimum of two anonymous reviewers. A book of abstracts and a CD-ROM containing all accepted papers were given to conference participants on site.

All accepted papers were published in two soft-bound volumes of IPDO-2007 Proceedings and mailed to the conference participants within three months after the symposium was finished. Each of the two volumes of the IPDO-2007 Proceedings had approximately 400 pages.

A CD with .pdf files of all papers was also mailed to all participants. It is added to this report.

Dulikravich, G. S., Colaco, M. J., Orlando, H. R. B. and Tanaka, M. (editors):

*Inverse Problems, Design and Optimization (IPDO-2007) Vol. I*, ISBN: 978-1-59916-279-9, Florida International University, Miami, FL, June 2007.

Dulikravich, G. S., Colaco, M. J., Orlando, H. R. B. and Tanaka, M. (editors):

*Inverse Problems, Design and Optimization (IPDO-2007) Vol. II*, ISBN: 978-1-59916-280-5, Florida International University, Miami, FL, June 2007.

Internet Dissemination: All papers presented at the IPDO-2007 were also posted on the IPDO-2007 website <http://www.ipdos.org/ipdo2007/> and made available to all of those that registered and/or attended IPDO-2007.

Journal Publication: Each author submitting a paper for presentation at the IPDO Symposium had an option to request that his/her paper, if addressing the general field of inverse problems, be reviewed and considered for a possible publication in the international journal *Inverse Problems in Science and Engineering* (IPSE) published by Taylor & Francis. Consequently, 58 of the 99 papers that were presented at IPDO-2007 were fully reviewed by three reviewers each. Fifteen papers were rejected and 44 full extended reviewed papers were accepted for publication in 6 special issues of the international journal *Inverse Problems in Science and Engineering*. All issues are to appear in IPSE in 2008.

From this table it is evident that IPDO-2007 Symposium was truly international

## 7. List of all participating scientific personnel showing any advanced degrees earned by them while employed on the project

As per Table 2, it is evident that \$8,117 of the total amount of \$10,000 budgeted in this grant was used strictly for paying stipends for several invited speakers. None of these individuals earned any advanced degrees while funded by this grant.

## 8. Report of inventions (by title only)

There were no inventions or patents that resulted from this funding of this project.

## 9. Bibliography

No literature was consulted when preparing this final report except for the two IPDO-2007 proceedings as follows:

Dulikravich, G. S., Colaco, M. J., Orlande, H. R. B. and Tanaka, M. (editors):

*Inverse Problems, Design and Optimization (IPDO-2007) Vol. I*, ISBN: 978-1-59916-279-9,

Florida International University, Miami, FL, June 2007.

Dulikravich, G. S., Colaco, M. J., Orlande, H. R. B. and Tanaka, M. (editors):

*Inverse Problems, Design and Optimization (IPDO-2007) Vol. II*, ISBN: 978-1-59916-280-5,

## 10. Authors that presented papers

IPDO-2007 full papers that were submitted for review and publication in *Inverse Problems in Science and Engineering* journal are marked with YES in the last column. If they were not submitted to the journal, they are marked with NO in the last column.
